GARDENVILLE  
BULB GROWERS  
TACOMA, WASHINGTON

IT IS with pleasure we present for your inspection and perusal this catalogue which has been prepared to show you what the Puget Sound country can supply in the way of bulbs for your garden. The climate of this favored region, which is comparable only to that of the British Isles, has possibilities for bulb production not generally known.

The finest bulbs of Daffodils and Tulips that can be produced are cultivated right here in our own United States and offered direct to you from the fields where they are grown.

The bulbs supplied are backed by our own personal service from the time they were planted in our fields through the various routine of culture and handling until they are shipped direct to you.

The *Narcissus* bulbs offered are all the finest selected No. 1 bulbs and the *Tulips* all Top Size, chosen to give the longest life and finest flowers in your own beds.

All shipments are sent prepaid excepting one special offer of *Narcissus* plainly marked "Sent by express. You pay express charges". In making the low prices in this catalogue it becomes necessary to omit all charge accounts and all C. O. D. shipments. We cannot fill orders below \$1.00. Please omit orders for less than 6 of a kind except where priced. Also, unless quoted, 6 or more of a variety are sold at the dozen rate; 25 at the 100 rate.

## DAFFODIL CLASSIFICATION

For those who are not familiar with the different classes of Daffodils, we offer the following brief descriptions:

The length and size of the central portion of the Daffodil, called the Trumpet, Crown or Cup, depending on its size, is the most variable part of the flower and determines its classification.

**Yellow Trumpet Daffodil**—Such as Emperor and King Alfred. See King Alfred illustration.

**Bi-color Trumpet Daffodil**—Of Emperor form but having white petals (perianth) and yellow trumpet.

**White Trumpet Daffodil**—White petals with a trumpet of white or nearly white.

**Incomparabilis**—See illustrations of Croesus and Whitewell. In this class the trumpet is shorter than

the Trumpet Daffodils, but longer and larger than the Barrii. It is about a three-fourth length trumpet. May be had in both all yellow and bi-color varieties.

**Barrii**—In place of trumpets this section has small crowns or cups, and the flowers are smaller than the above classes. May be had in both all yellow and bi-color varieties.

**Leedsii**—In form this is a combination of the Incomparabilis and Barrii classes. In color the petals are always white and the cup or crown, white, cream or pale citron. The Giant Leedsii are similar in form to the Incomparabilis, while the small-flowered Leedsii are similar to the Barrii.

**Jonquilla**—This and the Poetaz *Narcissus* are both bunch-flowered types, i. e., several smaller flowers on one stem. The Jonquils are a deep buttercup yellow and sweetly scented. The stems are smooth and round and deep green. The leaves are rush-like in form and also smooth and deep green. Trumpet Daffodils are mistakenly called Jonquils by many.

**Poetaz Narcissus**—Of the bunch-flowered type. The flowers have white or pale yellow petals and cups of pale citron, yellow or red. See illustration of Raphael.

**Poeticus**—The Poet's *Narcissus*. Single white flowers with small cups of red, yellow or red and green. See illustration of Cassandra.

Shawnee, Oklahoma.  
The bulbs received from you  
last fall were excellent—the  
best I have ever bought—  
they all produced perfect  
blooms this spring.  
MRS. M. ALEXANDER.

Winston, Salem, N. C.,  
April 9, 1937.  
Couldn't resist telling you  
how beautiful my bulbs were  
this spring. My room has  
been kept full of them for  
the past few weeks. You can  
imagine what a lovely sight  
one hundred King Alfreds  
made all in one big bunch.  
All the others were just as  
pretty, every one refusing to  
believe that I had raised  
them, declaring that they  
came from a florist. They  
were without a doubt the  
most beautiful daffodil that  
I have ever seen. — R. M.  
McARTHUR.

**COTTAGE TULIPS** lend an air of distinction and appeal to every garden in which their beauty is allowed to be displayed. They give a greater range of form and shape than can be found in the Giant Flowered tulips. The long pointed and sometimes reflexing petals appear more often than the cup-shaped, which gives them added attraction.

Do not confuse the Cottage with the short stemmed early tulips whose utility in the garden is of doubtful value. Cottage tulips are long-stemmed, large flowered, beautiful tulips suitable for cutting or growing in the border and flower at about the same time or a little later than the Giant Flowered Darwins and Breeders. By all means plant some this fall.

**Advance**—This new hybrid is one of the earliest of the May-flowering tulips. Its gorgeous and remarkable flower is fiery red with a blue base. Height 24 inches. **3 for 60c, \$2.25 doz., \$15.50 per 100.**

**Gesneriana Lutea** (5)—Rich yellow flower, of fine form and delightfully fragrant. One of the best yellow tulips. Height 24 inches. **70c doz., \$5.00 per 100.**

## DOUBLE COTTAGE TULIPS

These flower at the same time as the Cottage Garden Tulips and prefer a somewhat shaded position to help them carry their heavy heads upright during the hottest part of the day. Rich soil induces a greater number of petals.

**Mount Tacoma**—The flowers of this new tulip are so large as to rival the size of a full blown peony. Color is the purest glistening white. Superb for beds. **3 for 75c, \$2.50 doz., \$18.00 per 100.**

## MULTI-FLOWERED TULIPS

These interesting tulips instead of growing a single flower on a stem grow a strong main stem with from 3 to 6 branches each with its own flower. The result is 3 to 6 flowers are obtained from one bulb, and they are all of good size and gracefully carried. The soil must be rich for the best results.

**Monsieur Mottet**—Opens ivory white and later changes gradually to a deep pink starting to flush from the outer edges of the petals. Four or five flowers are carried on the main stem which are in bloom at the same time. An excellent garden variety and very interesting. Height 26 inches. **75c doz., \$5.50 per 100.**

## PARROT TULIPS

**Fantasy**—The finest Parrot Tulip and one of the loveliest tulips grown. Unlike other Parrots, Fantasy has a strong stiff stem which holds its large flower upright. It is a sport of the Darwin Tulip "Clara Butt" and has the same base color, time of flowering and other characteristics. Its color is a beautiful clear pink, peculiarly flaked on the outside with apple green. The petals are laciniated after the manner of Parrot tulips, and the whole flower has a quaint and beautiful form. **\$1.00 doz., \$7.50 per 100.**

CROCUS

## EARLY Flowers

### CROCUS

The Crocus, one of the earliest flowers of Spring, occupies a deservedly prominent place in every garden. They are extremely effective, either when planted in bold groups in the grass or in broad wavy lines along the border. Plant them early, and place the top of the corm 3 to 4 inches below the surface of the soil.

Large masses produce a wonderful effect in the garden during April and May. The flowers are fragrant and very valuable for cutting. These great crocus-like flowers carpet the ground in September and October without foliage. The foliage appears early in the spring about the same time tulips are in flower and disappear in June. If planted in August or early September the bulbs bloom almost immediately, but are at their best when well established. They are especially valuable between taller growing plants in the rock garden, in flower borders and the wild garden. Not available after October 1st.

**Autumnale** (3)—Very free flowering, valuable for naturalizing, rosy mauve flowers. 4 bulbs \$1.00, \$2.60 doz., \$17.25 per 100.

### Dutch and Spanish Iris

These two bulbous irises are very much alike in form and general habits as well as requirements. The Dutch are earlier and have flowers slightly larger. The Spanish are later and have taller and more slender stems. They are among the prettiest of all the Spring flowers for cutting and garden decoration and are orchid-like in their beauty of form and color. They are easily grown and will do well either in full sun or partial shade. If you have never grown bulbous iris, be sure to include some of these in your order.

**Imperator** (Dutch)—Very large and beautiful flowers of a uniform rich dark blue. Strong grower and one of the best.

**Hart Nibbrig** (Dutch)—Lovely light azure blue with golden blotch; late.

**Golden Glory** (Dutch)—Rich deep golden yellow. Very showy and beautiful; early.

**Rembrandt** (Dutch)—An early variety with flowers of great substance. Dark blue with conspicuous large orange blotch on the falls.

**Cajanus** (Spanish)—A late tall growing variety with very large and handsome flowers of brilliant yellow.

**Mixed Colors**—Made up specially from many beautiful named varieties.

### English Iris (Garden Orchids)

These magnificent bulbous irises thrive in any good garden soil, but prefer a good moist loam. They are quite hardy and are being grown successfully in cold climates. Flowering from the latter part of May to the middle of June, they are the latest of the bulbous iris to bloom. As cut flowers they take first place.

**Choice Mixed Colors, 50c doz., \$3.75 per 100, postpaid.**

The following named varieties are all strikingly beautiful and the most distinctive English Iris in cultivation:

## IRIS

### Japanese Iris

The popularity of Japanese Iris is increasing as their many advantages about the garden are being realized. Not only do they make splendid backgrounds for lily pools, but in the border they form masses of gorgeous color and are extremely useful for cutting.

The roots will be sent in September, which is the better time to plant as it allows them to become established before freezing weather sets in.

#### SHADES OF OLD ROSE AND MAROON

**Fukushima**—Six petaled rose-pink.
